DESCRIPTION: Heat Shield Kit Complete

PART NUMBER: 902490

APPLICATION(s): Commander 2011-17, all two seater models

KIT CONTENTS:

Heat shield set A-K	QTY 13
Reflect-A-Cool tape	QTY 1

TOOLS NEEDED: Contact cleaner, flat screw driver, T25, T27, T30 Torx drivers, scissors, tape, silicone, or glue.

OVERVIEW: A 13 piece heat shield kit to help reduce cockpit heat on the Can-Am® Commander™. Each shield is labeled for its location.

Fig. 1

1. Remove seats, (see owners manual)
2. Remove Torx fasteners and rivets on the instrument panel and slide forward in order to remove the center console. Fig. 1
3. Remove grab handle and unscrew the gear selector knob from the center console. Fig. 1
4. Remove plastic rivets using a panel tool or flat screw driver on the center console. Fig. 2
5. Remove remaining Torx fasteners and plastic rivets on the both side console panels. Fig. 2
6. Remove Torx fastener and 10mm nut for side netting frame anchor (A) along with plastic rivets on the clutch assembly cover. Fig. 2
7. Once panels are removed, peel away any existing stock foam. You may have to use contact cleaner to remove the adhesive.
8. Peel and stick insulation pieces into place. Use supplied Reflect-A-Cool tape to cover sharp edges and seams. See parts diagram (back) for correct placement.
9. **Note:** to reinstall side netting anchor, place some tape around the nut and silicone on the washer in order to keep it stationary in the wrench. Fig. 3
